9) LAO Pilot project	<p>Uppala provided an update to the Committee on the Legal Aid Ontario Quick Intake Tool project. This project’s proposal for funding was presented to the P-HSJCC during the January 2014 meeting.</p> <p>The purpose of the project is to develop a brief screener that can be used by duty council to help identify people with mental health and addictions issues. The initial phase of the project will be researching mental health and addictions screeners or intake tools that have already been developed that can be used by non-clinicians. The goal will be to have a pilot site implementing the tool in the Fall of 2014. Based on the findings of the pilot, changes/adjustments will be made to the tool and then available on a provincial scale for implementation. The tool will be available in French and English. The project is fully funded by Legal Aid Ontario.</p> <p>There has also been an Advisory Committee formed to help guide the work of this project. Members of the P-HSJCC have been asked to join the committee, as well as other justice/mental health professionals.</p> <ul style="list-style-type: none"> • It was suggested that it may be helpful for someone to be included from the Bail Court Process review as they would have expertise in frontline screening within a legal context. • The committee will be discussing the development of the tool in addition to risks and challenges associated with implementing a screening tool such as privacy and confidentiality. <p>The P-HSJCC then discussed initial thoughts on the project:</p> <ul style="list-style-type: none"> • It was suggested that there should be a coordination piece included in the project so that clients are not required to complete too many intake forms/protocols in legal proceedings. • It was stressed that the screener should ensure to also screen for addictions, and not just mental health issues. In addition, the screener should also pick up on dual diagnosis and/or developmental disabilities. • A question was raised about the referral process once a client’s mental health and/or addiction need has been determined. This will be a topic for the discussion of the Advisory Committee. • Another good item to screen for would be the risk of re-offending and/or a client’s likelihood of causing harm to themselves or others.
10) Service Collaborative Evaluation Plan, Data, and indicator discussion	Betty Lin, Provincial System Support Program CAMH, provided a presentation to the P-HSJCC on the Service Collaboratives evaluation plan, data, and indicators. This project can be picked up by the CMHA Ontario Summer student who can develop a repository of the provincial court support programs.</p> <ul style="list-style-type: none"> • It was suggested that this project look at the ability for ConnexOntario to provide information or contribute in some way as they have a data base of all healthcare programs in Ontario. • The committee was agreeable to this project being conducted by the CMHA Ontario summer student. <p>Seniors project: A potentially larger project that is currently being scoped out would be looking at the issue of their interactions between the justice system and seniors within Ontario. This project would be an issues and options paper regarding this topic, which would include a survey and scan of what the issue looks like in Ontario.</p> <ul style="list-style-type: none"> • It was noted that the Ontario Network for the Prevention of Elder Abuse is looking at the same issue so connections could be made when developing the project. • Joan also indicated that there was some research completed on this topic by the Royal Ottawa. Also, the Forensic system may be training their employees in this area. <p>ACTION: Sue will follow up by providing information on the aging profile of offenders in custody within her Ministry.</p> <ul style="list-style-type: none"> • It was also noted that the Service Collaboratives have been discussing this issue too. • Initially this project should be descriptive, without too many perspectives included. Then the research can determine more specific and refined questions that can be explored further. • Olenka indicated that she could get some data for Dorina from Corrections that may benefit this project. • It was noted that Veterans affairs are also working in this area.
<p>13) Capacity Building Proposal for HSJCC</p>	<p>The Capacity Building Proposal has been sent to the Ministry of Health and Long-Term Care for their consideration.</p> <p>The proposal will be brought forward to the Interministerial Committee tomorrow and Chris Higgins will provide an update to the P-HSJCC afterwards.</p>
